

Dear Poodle Rescue of Houston -

Thank you very much for loving me and taking care of me while in your care for almost 7 months! I wanted to let you all know that I am very happy with my new mommy. She is very very loving and sweet. She has renamed me, Dr. Mac Lux, Dr. Lux for short. It think it is strikenly handsome name, just like me.

Mommy took me to the doctor today. She was worried because I had not been eating too much since I've been here. My doctor is with the Arbor Animal Clinic in Austin, Texas ([www.arboranimalclinic.com/](http://www.arboranimalclinic.com/)). All the staff and doctor were very nice. The doctor gave me a throrough exam today. He said I am not eating too much due to the stress of this wonderful life change. I did eat tonight because I got some A/D food that goes with my dry food. Mommy says it smells a little but it was soooo yummy. I ate all my dinner. The doctor said I am still mange free. He also said that I am a really sweet boy. Mommy bought my all my heartworm and flea meds which I will take tonight. I think she will put it in a hotdog for me to make sure I take the medicine.

I will meet with my hairstylist (at PetSmart) sometime next week or the week after. I will get my hair cut, nails clipped and teeth brushed. I will send you a picture of my new do. My Thanksgiving plans include meeting my new family (grandparents, cousins, etc.). I look forward to spending time with my cousins Joey and Remy (they were there when I was adopted). I am looking forward to my first real Christmas. I will be getting a new Christmas outfit. I just hope it's not girly! I also hope to get my picture taken with Santa Clause. I hear he is coming to town and I have been a good boy. I won't ask Santa for anything since I got the best present ever, a loving home. I overheard my Mommy says I will get a stocking and some presents. I can hardly wait!

My new home consists of a huge backyard where I have lots of room to run and jump. I am trying to teach mommy how to catch me when I jump since I jump so high. I sleep in a nice, warm, and comfy bed. I have freedom of the entire house. I've explored the bathroom, living room and kitchen. I was a little scared at first but I am getting used to things now, even though its only been a few days.

My days have consisted of sleeping on the bed, watching TV, playing outside and getting my belly and ears rubbed. Its a beautiful life. I am still getting used to it but I should get there in a few weeks. I'll keep you posted.

Here are a couple of pictures of me in my new living room.

Love to you all,

Dr. Lux

Regards,
